Slide Compound Miter Saw
LS1019 / LS1019L 260mm (10-1/4")

Single sliding system enables smooth operation to produce superior cuts

High precision cutting

One-touch Sliding lock
can be easily done by removing/ inserting the lock pin.

Independent laser switch (LS1019L only)

Excellent sliding durability of safety cover

Front knob for easy level angle adjustment

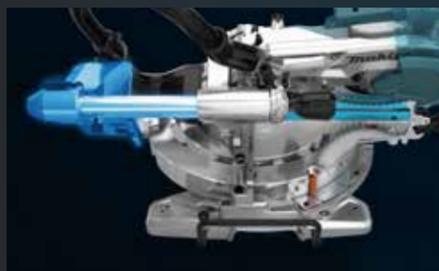

Integrated guide fences

DXT

Diameter of slide pipe is changed from 25mm to 30mm. Moreover, by redesigning Arm section shape, the precision at bevel cutting is increased.

Sliding on pipe
Ø30mm

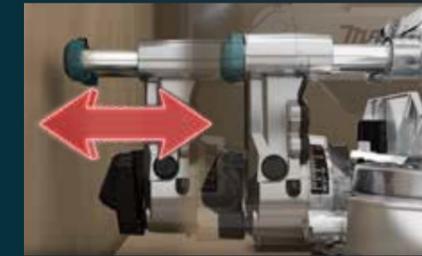

Integration of Guide fence and Lower fences provides the rigidity more than the separation structure.

Rail-forward design enables to be placed against a wall for maximizing work space

Motor head slides on fixed pipes without extending machine rear end, so the machine can be placed close to wall.

Conventional model
needed to set apart from the wall

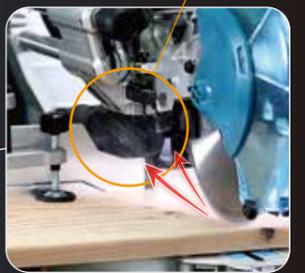

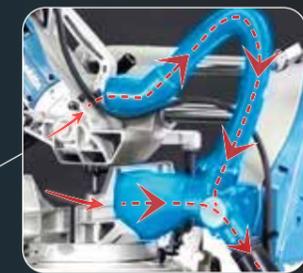

LS1019/LS1019L
can be placed close to wall

Excellent dust collection

When cutting the low height workpiece, the dust collecting is more effective than current model because of the dual improved dust collecting port.

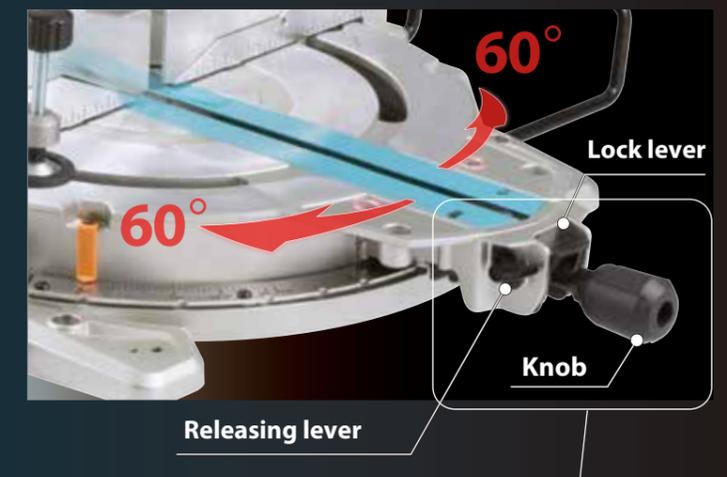

Large turn base

supports even large workpiece stably.

Easy-to-operate miter angle lock

Miter angle can be unlocked by turning Knob counterclockwise while pushing down Lock lever.

Once Releasing lever is pushed down:

- Turn base can be moved without pushing down Lock lever.
- The turning action is smooth because positive stops are released.
- Miters 0°-60° left and right, with positive stops at 0°, 15°, 22.5°, 31.6°, 45° and 60° (left and right)
